THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. ## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

**DETAILED ACTION**

***Response to Amendment***

1. Applicant's amendment and remarks received 07 October 2008 have been entered.

***Allowable Subject Matter***

2. Claims 1-12 are allowed.
3. The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows or suggests a spark plug comprising, in addition to other limitations of the claim, a tubular insulator and a metallic shell having therebetween a gap of less than 0.45mm at a more front end side of the tubular insulator than an engagement position of a packing and a first insulator stepped portion, and the gap between a tubular insulator and a metallic shell is provided axially from a most front end side engagement position of the packing and the first insulator stepped portion as a starting point to a finishing point that is apart from the starting point by 1.2mm or more toward the front end side of the metallic shell while being apart from the front end surface of the metallic shell by 7.9mm or more toward a rear end side of the tubular insulator.
4. The closest prior art of Matsubara (US 6,091,185) to independent claim 1 teaches, in Figure 11, a spark plug comprising a tubular insulator (2) having an axial through hole and a first insulator stepped portion that reduces in an outer diameter of the tubular insulator toward a front end side of the tubular insulator, a rod-shaped center electrode (3) disposed in the through hole of the tubular insulator, a metallic shell (1)

having a first metallic shell stepped portion that reduces in an inner diameter of the first metallic shell stepped portion toward a front end side of the first metallic shell stepped portion and supporting the tubular insulator through engagement of the first metallic shell stepped portion and the first insulator stepped portion by interposing therebetween a packing (10), and a ground electrode (4) connected at an end of the metallic shell to a front end surface of the metallic shell and facing at the other end portion and the rod-shaped center electrode.

5. However, Matsubara fails to exemplify a tubular insulator and a metallic shell having therebetween a gap of less than 0.45mm at a more front end side of the tubular insulator than an engagement position of a packing and a first insulator stepped portion, and the gap between a tubular insulator and a metallic shell is provided axially from a most front end side engagement position of the packing and the first insulator stepped portion as a starting point to a finishing point that is apart from the starting point by 1.2mm or more toward the front end side of the metallic shell while being apart from the front end surface of the metallic shell by 7.9mm or more toward a rear end side of the tubular insulator, as recited in independent claim 1. Due to their dependencies upon independent claim 1, claims 2-12 are also allowable.

6. The subject metallic shell structure described earlier is provided for improving the heat resistance together with the fouling resistance. The design is new and unique to the art.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2889

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
